HDOC DAY 73

PROBLEM

1. Define an enumeration for traffic lights (RED, YELLOW, GREEN) and print 'Stop', 'Wait', or 'Go' based on its value.
    - Input: GREEN
    - Output: Go

CODE

```
#include <stdio.h>

#include <string.h>

enum TrafficLight

{

   RED,

   YELLOW,

   GREEN

};

int main()

{

   char input[10];

   enum TrafficLight light;

   scanf("%9s", input);

   if (strcmp(input, "RED") == 0)

      light = RED;
```

```
    else if (strcmp(input, "YELLOW") == 0)
        light = YELLOW;
    else if (strcmp(input, "GREEN") == 0)
        light = GREEN;
    else
    {
        printf("Invalid input");
        return 0;
    }

    switch (light)
    {
        case RED:
            printf("Stop");
            break;

        case YELLOW:
            printf("Wait");
            break;

        case GREEN:
            printf("Go");
            break;
    }

    return 0;
}
```
