HDOC DAY 69

PROBLEM

Write a recursive function to generate the **first n Fibonacci numbers**. Also count the number of recursive calls made.

CODE

```
#include <stdio.h>

int calls = 0;

int fibonacci(int n)
{
   calls++;

   if (n == 0)
      return 0;

   if (n == 1)
      return 1;

   return fibonacci(n - 1) + fibonacci(n - 2);
}

int main()
{
   int n;
```

```
    printf("Enter n: ");
    scanf("%d", &n);

    printf("First %d Fibonacci numbers:\n", n);

    for (int i = 0; i < n; i++)
        printf("%d ", fibonacci(i));

    printf("\nNumber of recursive calls = %d\n", calls);

    return 0;
}
```
