HDOC DAY 65

PROBLEM

Write a recursive program to solve the **Tower of Hanoi** problem for **n** disks and display all moves.

CODE

```
#include <stdio.h>

void tower_of_hanoi(int n, char source, char auxiliary, char destination)
{
   if (n == 1)
   {
      printf("Move disk 1 from %c to %c\n", source, destination);
      return;
   }

   tower_of_hanoi(n - 1, source, destination, auxiliary);

   printf("Move disk %d from %c to %c\n", n, source, destination);

   tower_of_hanoi(n - 1, auxiliary, source, destination);
}

int main()
{
   int n;
```

```
    printf("Enter number of disks: ");
    scanf("%d", &n);

    tower_of_hanoi(n, 'A', 'B', 'C');

    return 0;
}
```
